

Please vote NO to SB184 and HB5262.

These bills would basically make absentee voters not have to have an excuse. This would end up with mass mailings based on outdated voter roles. This would be very expensive to the state. Also the voter roles have ineligible voters who have since moved, died, or are registered in multiple locations. There's no way to know who actually filled out these ballots. There's not enough security built into such a large scale absentee voting system. If someone needs an absentee ballot they can request it. That process could be made more straightforward and people can be educated on the process, as a compromise to those who favor these bills. We should vote no on these bills.
